Wrzonance takes you on a journey through trance, techno, psy-trance, and ambient styles of inner discovery. 11 MP3 Songs ELECTRONIC: Trance, ELECTRONIC: Ambient Details: I have been producing and experimenting with sounds and music since age 13. I grew up in the rural community of Lakebay, Washington in the Pacific Northwest. It is located on the small Key Peninsula in the Puget Sound. I continue to grow here and gather inspiration from my loved ones and the environment around me. Interest in music is ubiquitous--our goals and feelings, however, are different from one person to the next. And it's that drive to create that separates musicians and artists from enthusiasts. However in today's modern commercialized world, the line between trite and creative has been blurred more than ever. With electronic music finding a wider audience and mainstream following it's easy to get glum sometimes about the "state of trance," and electronic dance music in general. I believe you shouldn't take yourself or the music you enjoy too seriously. It only leads to pig-headed debates over a very subjective subject: taste. Because while I love music, and love to produce music. I also realize that feeling that way isn't special, its universal. So like many other artists, I want other people to hear my music. So have an open mind, and purchase a CD for a starving artist. You're karma will thank you. "If you can walk you can dance. If you can talk you can sing."
