Easy Corner Peel Ads

"Get Your Ads Noticed With These Non-Intrusive Cool New Corner Peel Effects." Dear Friend, Have you ever seen those cool little "corner peel" effects that expend when you put your mouse over them? Ever wondered how to set one of those up on your own site? These corner peel ads are a very effective way to bring attention to certain special offers or pages on your websites that you want your visitors to see. They're sort of like pop-ups, but less intrusive and less annoying. Although pop-ups do work great, and I use them myself, I'm sure you can agree that they CAN get quite a bit annoying at times. There is a place and time to use pop-ups, and then for some other type of offers, it's better to mix things up and use something different - like corner peel ads. These corner peels ads just sit there in the corner, and just beg to be "peeled off". And it's up to the website visitor if they want to see the ad or not (it doesn't automatically pop up in their face). Here's how it works... 1. A person comes to your website and sees a little animated image in the corner of your site that says something like "free offer", or "special discount". This image has a slight animation that get's it noticed. 2. The person is curious and goes to click on the image with their mouse, and when they "mouse over" the small image, it expends to reveal the full ad.

This full ad could be for anything you want like: a special discount sale, a free gift, an affiliate program, etc.. Basically something special that you want your visitors to see. It's a great way to get your visitors to the pages you want them to visit first. AND it's not intrusive or annoying like pop-ups can be. So if this sounds like something you'd like to use, I'd like to introduce... Easy Corner Peel Ads Easy Corner Peel Ads is a product I created to make it super easy for you to add one of these cool corner peels to your own website. There are other products out there for these corner peel effects, so what makes this one special? What makes "Easy Corner Peel Ads" unique are the premium quality templates that come with the package. When using these corner peel ads, you want to make sure that people actually want to click them and that they look nice. And most other corner peel scripts come with cheesy looking templates or without any templates at all. With THIS package you get... 24 Premium Quality Corner Peel Templates (with full PSD source files)... These are the images your website visitors will see when they mouse over the small corner ads. You'll get 24 premium quality pre-made templates in layered PSD format. Since these templates are already pre-formatted, all you have to do is just type in your own details (like a headline and some simple copy to explain the offer), and your design is done. You can add your own images, logos, and text to these templates. And you can also change the colors move things around, take certain elements away, etc.. You get fully customizable layered PSD files, so you can make these designs look truly your own. You also get... Ready-To-Go Small Corner Templates These are the small images your visitors will see in the corner of your site, that will entice them to "mouse over" to see the full ad. These templates come with 7 different pharses: "Special Offer", "Free Trial", "Free Gift", "FREE", "Special Discount", "Earn Money", "Get PLR". And 5 different colors: black, red, blue, white and green. You also get PSD source files to all of these templates so you can make them say what ever you want, and change the colors to what ever you want. Ofcourse, you also get... The corner peel script This is the actual javascript that makes the whole corner peel effect. The script is very easy to use (you don't need any technical skills at all). You just have to upload a few files to your server, and modify a few lines of code. All this literally takes just 5 minutes. And it's all broken down for you with the... Simple step-by-step instructions This product is really simple to use, and literally takes just a few minutes to get started. But you still get step-by-step instructions to be up and running right away. If you can copy and paste and have some very basic HTML skills (can change a few lines of code and can upload a file to your webhost) you'll be able to set up this these corners ads in literarally 5 minutes.
