glitch techno 16 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: House Details: The drone ooooooo. Just kidding. Its a deep sound categorized by echos and layers or what else you want to call it thus the title of this disc or the main track on the disc well I am Chris Brown and I think that the drone is stupid just kidding the drone is a mood. Sometimes I feel like playing my computer with a drone or with some house or maybe something else entirely. Well a drone is also a word used to call a robot thus the title drone. I dont know Im droning I feel very drone at the moment. Do you get it? So Ill try and lighten up the disc only has a few drones. But there are different sounds to music like a high a mid and a low every thing inbetween is what makes it interesting the clap for example is only a clap unless you kick the clap with a filter let us say the phrase GQ ON THE EQ! now with a drone you can sweep everything or just make it totally zonk out! Do you get the drone? The way you fell when you wake up is the drone feeling but I drone also right before I sleep there is a way to make a drone not just a drone any more guess where Im heading? Ambient. Fall asleep to my drone or bounce to it. I dont mind. Let me analyze this Im a guy. As I write this most men do not shave their body. It is reserved for like body builders and swimmers. Or who else likes their body with out hair. So the question to make a guy drone is to shave or not to shave? Uhhhhh. I dont know do you think itll help me get chicks? Ha.
