Live Neo-Soul Music, Sweet and Sexy 11 MP3 Songs URBAN/R&B: Contemporary urban, URBAN/R&B: Soul Details: I first released this album in 1999. The first pressing was seriously a limited edition. It has been out of print for nearly 3 years. In 2001 it was licensed to an independent label in the UK: Cafedesoul. They did a fine job globalizing it in underground soul circles. The music sold in places I have never even been. A fine thank you to them in extending the availability of this album. Now it is my turn once again to make it available. At this point in my life I am thankful for times spent with loved ones, I'm closer to loving myself and my loved ones unconditionally. These songs are deeper in meaning to me today, than I could've dreamed. As my life changes the meanings to the songs also changes; informs me. This was my first attempt at making an album. I learned what it takes to finish what you've started and also know when to quit. The value of time and learning to use your world to deepen and accomplish your desires. I also learned that making the album is the fun and easy part. People I don't know or barely know tell me that this album is responsible for (or at least part of) hot nights of passion and babies on the way. Good. Continue. Blissful, which most people say is very Stevie Wonder-esque, went on to be licensed by JazzFM. I sincerely hope that you enjoy this music. Invite it into your life as I invite you into mine.
