

# The Pedagogy Of Physical Science

[DOWNLOAD HERE](#)

CHAPTER ONE- INTRODUCTION - CHAPTER TWO- CONCEPTUAL CHANGE AND LEARNING

ABOUT FORCES- 1. THE CHALLENGE OF LEARNING ABOUT FORCES AND MOTION- 2.

CONCEPTUAL CHANGE: A BRIEF HISTORICAL PERSPECTIVE- 1. The influence of Piaget - 2. The classical model of conceptual change- 3. Developing knowledge and understanding of learners

conceptions in science- 4. Some theoretical models of conceptual change- 5. Considering the individual s

world- 3. CONCEPTUAL CHANGE IN ACTION: PRIMARY TEACHERS LEARNING ABOUT FORCES- 1.

Forces within the context of floating and sinking- 2. The sociocultural environment and the role of the

tutor- 3. Learning in action: floating and sinking- 4. Initial ideas - 5. Constructing and reviewing

hypotheses- 6. Developing a forces view of floating and sinking- 7. Generalizing weight for size- 8.

Understanding forces in different contexts towards context independent learning- 9. The arched bridge-

10. The parachutist- 4. SOME CONCLUSIONS AND IMPLICATIONS- 1. Reflections on how teachers

and trainees develop a qualitative understanding of - force and motion- 2. Developing pedagogical insight

through employing a metacognitive approach to- learning. - 3. Some implications for teacher education -

CHAPTER THREE- THE ROLE OF ANALOGIES IN LEARNING- 1. LEARNING ABOUT SIMPLE

CIRCUITS- 2. APPLYING ANALOGIES TO SIMPLE CIRCUITS- Analogies deployed - Synopsis of

research findings- Initial ideas about a simple circuit - Tracking learning within the groups- 3.

IMPLICATIONS FOR PEDAGOGY- The problem of analogies in developing a sequential view of simple

circuits- 4. EXPLANATION AND MEANING- The appropriation of hermeneutics- Exemplification of

language and meaning- Alternative perspectives on knowledge acquisition- Partitioning and sequencing-

The presentation of science knowledge in science education- 6. PRACTICAL IMPLICATIONS FOR

PEDAGOGY: TEACHING- 7. TEACHER SUBJECT AND PEDAGOGIC KNOWLEDGE - CHAPTER

FOUR- COGNITIVE CONFLICT AND THE FORMATION OF SHADOWS- 1. PROMOTING

CONCEPTUAL CHANGE THROUGH COGNITIVE CONFLICT- The role of cognitive conflict in learning

science- Some limitations of the cognitive conflict strategy- 2. THE CHALLENGE PRESENTED BY THE

CONCEPTUAL DOMAIN OF LIGHT- 3. EXPLORING THE IMPACT OF COGNITIVE CONFLICT IN

LEARNING ABOUT SHADOWS- Background to the exemplification study- The cognitive conflict scenarios- Learner responses to the cognitive conflict scenarios- Categories of responses to the cognitive conflict scenarios (1-3)- Triggering meaningful cognitive conflict- 4. RESOLVING THE CONFLICT 1. The need to generate causal explanation 2. Resolving the cognitive conflict caused by the cross-shaped shadow- 5. THE EMERGENCE OF PEDAGOGICAL INSIGHT- 1. The Learning Process- 2. Pedagogy relating to light- 3. Pedagogical implications for future practice- 6. DISCUSSION- 7. SOME CONCLUDING REMARKS - CHAPTER FIVE- LANGUAGE INTERPRETATION AND MEANING - 1. CONCEPTUALISING HOW LANGUAGE WORKS - A brief look at language as a system or structure- 2. SIGN AND SIGNIFICATION- 3. SIGNIFICATION IN SCIENCE LEARNING- Paradigm constraints in reasoning- The relational value of the sign- 4. INTERPRETATION AND MEANING- What counts for text?- Language and accessing the world (electricity)- Possibilities and constraints- Shaping the ontological landscape - Distancing... EAN/ISBN : 9781402052712 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Heywood, David
