Torcs (pc Game)

[DOWNLOAD HERE](#)

TORCS (PC GAME) TORCS is a 3D racing cars simulator using OpenGL. The goal is to have programmed robots drivers racing against each others. You can also drive yourself with either a wheel or keyboard or mouse. There are 42 different cars, 30 tracks and more than 50 opponents to race against. You can steer with a joystick or steering wheel, if it's supported by your platform. It is also possible to drive with the mouse or the keyboard, but it's not easy. Graphic features lighting, smoke, skidmarks and glowing brake disks. The simulation features a simple damage model, collisions, tire and wheel properties (springs, dampers, stiffness, ...), aerodynamics (ground effect, spoilers, ...) and much more. The gameplay allows different types of races from the simple practice session up to the championship. Enjoy racing against your friends in the split screen mode with up to four human players. System Requirements: Windows 98, 2000, ME, NT, XP, Vista & 7
