Behold a powerful method to date, in displaying your uploaded files thru a browser! FileXeeker is the ultimate tool to use as a browser file manager thru AJAX. The superbly simple interface makes it intuitive enough for users, from beginners to advanced! Seeing IS Believing! FileXeeker can be easily integrated into almost all web pages! As the administrator, you will have full access over which folder permits your user to Upload/Rename/Download/Delete/View/Create New Subfolders Just Some Ideas How You Can Benefit From This Excellent Tool Right Away! * Build your list!-Stuff up FileXeeker with freebies and allow only opted in subscribers to download. Trust me, you'll find it so fast to upload up to hundreds of items without worrying to copy and paste the links. * Build a Paid Subscribers Stock Photo Website !- Create sub-folders named after categories and load up your own stock photos. Then use a third party membership script (not included) to handle subscription. Easy! * Organize Multiple Downloads !- ...Instead of copying and pasting your links for, let's say, bonuses and related free products, why not use File Xeeker. * Build Your Own Viral Giveaway Website!- Allow the participants access as administrator and let them create their own subfolders named after their own products and they can later upload the

products themselves! * Create Your Own File Sharing Community - If you have a group of people who share the same passion, why not create a repository where you can share files, photos and other stuffs only your exclusive group can view? Just think about it....while this are just some ideas of how you can leverage through FileXeeker...picture what you can gain when you add a little imagination. ;) No Technical Experience Required! "Wow! That's awesome! But Jahn, I am not really a techie person....and I don't really know database configuration...how can I use your software?" FileXeeker comes packed neatly in a desktop installer that'll allow you to configure and upload your configured FileXeeker through it's built in FTP program in mere minutes! ...and we assume that most just hate the idea of configuring MySQL DB because it's way to technical....so FileXeeker was built without any MySQL config to worry about! Now you might be thinking that a much needed, excellent tool like this will cost an arm and a leg... If you had to hire a programmer to create this system for you, you could spend upwards of $1200 to $1500 dollars to have this put together... But, I'm not going to even come close to that price! But like all great things, the end product turns out to be so amazing that it can be applied to other tasks and other industries as well. And what we have right now is just the tip of the iceberg. Own this magnificent solution today and conquer new grounds with the power it'll give you! System Requirements: UNIX/Linux Operating System, PHP Version 4.2.x or PHP V 5.x, Ability To Use and Edit .htaccess Files With Mod-Rewrite Redirect Enabled. GD extension enabled (default on most installations) for thumbnails support. If this extension is missing, thumbnails are automatically disabled. + 30 SuperAdsense themes get money whit adsense Tags: themes
