

# Mp3 Bruce John T - Acoustic Etchings: Volume 1

[DOWNLOAD HERE](#)

Fingerstyle Acoustic Solos Articulate, warm and Provacative. Tunes to get you motivated to help the guitarist develop, improvise, and create your own style while playing or listening to the arrangements of stories being portrayed. 15 MP3 Songs BLUES: Acoustic Blues, ROCK: Acoustic Details: Bruce John T has been playing guitar for over 32 years and been painting for over 40 years long since he can remember picking up a paint brush in his early years as a youth. During this time after attending Youngstown State University as a Computer Technology major he has had great interest in music in rock such as Led Zeppelin, Allman Brothers band, Lynard Skynard, and various other guitarists and artists throughout his career. He had taken drawing classes to start off with from well known artists in college and other painting classes to help create and grow from there artistically which has flourished over 250 paintings that have been in various art shows, studios, and homes throughout Western Pennsylvania and Northeast Ohio. During this time I have played and performed in various blues bands playing lead guitar and has now decided expand and create solo songs with a vast repertoire of different sounds and more freedom in expression in a mix of classical, blues, rock, and jazz all combined to create sound with non-tiring energy throughout finger style solos. Painting on Acoustic Etchings Volume 1 is done from Amish Farm in the New Wilmington, Pennsylvania country which is the heart of most amish farmers that reside there. Bruce rarely has amish people portrayed in any sketches or paintings to respect their privacy. Hopefully a volume 2 CD will follow upon distribution of the current CD's that has been published at this time. I wish to complete more new creations utilizing various artists styles such as Phil Keaggy, Laurence Juber, Jimmy Page, Al Pettaway, Peter Finger, Preston Reed, Warren Hayes, Steve Morse and other great guitarists styles that has influenced me in making this project a reality and to publish this astronomical enterprise in it's entirety to complete, and to help other musicians create more new tunes

and sounds that all can listen to as well. In closing all sales from the CD will go towards to fight Multiple Sclerosis and Autism that many people have including (printed on the CD) my wife Patricia is fighting this disease every day and her nephew John has Autism. At the present time research is slow in finding cures for dreaded diseases such as the ones mentioned and funds are always in demand to continue to develop new medicines in combating these illnesses with new technology. Again this CD has been a milestone to complete so I am hoping that it can belong somewhere in Acoustic Fingerstyle arrangements for guitarists! Thank you Bruce John T 12/15/2006
