

# Mp3 Eddie Florano - Cool Ukulele Songs

[DOWNLOAD HERE](#)

we hear alternative, rock, hard rock, country rock, full blast bass and drum beats all the time in the air waves... and summer weather becomes hotter each year... so it's time to listen to the cool stuff... something different. aloha. 15 MP3 Songs WORLD: Island, WORLD: Reggae Details: Winner of international Glory songwriting competition... and one of the top unsigned or Indie artists in NJ, Southeast Asia and online. His winning piece captivates the hearts of many. He is currently the bass guitarist co-singer of the amazing "Wildwood Trade Winds" and "Lotus Band". He was the rhythm guitarist of "Perlas Ng Silangan" (Pearl of the Orient). If you wanna see him play and sing LIVE with the band, go to Wildwood in New Jersey every summer. Thanks! His unique vocals and music styles include folk, rock, rock 'n roll, country, reggae, calypso, gospel, inspirational, tribal/ethnic and etc. His style of songwriting is unique and sometimes unpredictable of what he will do on his next albums. Surely an interesting talent!

\*\*\*\*\* ABOUT THE ALBUM: COOL UKULELE SONGS

\*\*\*\*\* It contains great and cool island tunes... and music for the lovers. Something different... \*\*\*\*\*THANKS!!!\*\*\*\*\* There are a

lot of artists in CDBabythat can definitely and really compete to the best "highly promoted/overly advertised/highly budgeted" artists in the "major labels". Radio stations can make the difference... if only they will play at least 1 or 2 of the best and greatest songs of each CDBaby/Indie artists. If that will be realized, then, there will be a flood of unknown great artists and music that listeners need to know and hear... than just a million times a day "repeats or spins" of a song;) Due to the introduction of Internet and e-digital "music" market, an amazing surge of indie/unknown talents came out worldwide and these artists can definitely compete against the highly-budgeted/highly-promoted artists under the grip of the powerful major labels and record companies. This is 21st century folks and it's just ridiculous to think that only few

artists or groups/bands/color that can do amazing things (per published media and recorded history)...The world is a huge, huge, huge arena folks! Just like in mathematics, a problem can be solved in different ways than just one solution. Before the introduction of Internet, people think that an aquarium of major labels' talents is the ONLY best in the world... Nowadays in the high-tech years and the future, the "music" aquarium is not measured on the size of the glass... Not anymore! It's not measured or limited to how many fish or what kind of fish/species you put in the "glass" aquarium... but behold, there is the free-flowing, unlimited and unfathomed OCEAN... let's break that musically controlled glass aquarium! Let's give chances to the unlimited music of that endless, borderless and uncontrolled OCEAN! There's not much difference between popular artists and the unknown ones... the only difference is they have multi-million promotional teams/analysts to push them and their songs up! Now, due to the introduction of Internet and e-digital "music" market, indie artists can have a fighting chance to compete and be heard! This amazing high-tech revolution gives way or open the doors to the TALENTS OF THE WORLD, than just blown up talents of certain companies! It's time to change the one-way music path of the big timers, let's support the multi-edifices, multi-faceted or multi-pathways of the music world. Support the "David-like" artists against the controlling music Goliaths! Thank you all! Support all indie music and musicians! Also, thank you, Derek for everything! There are not enough A&R representatives, talent scouts and music reporters who know or who can name the talents of the world. So thank you, Derek for making this cdbaby which is the favorite place of the music of the world! Check these articles: downhillbattle.org/reasons mndaily.com/article.php?id=36590 cdbaby.net/courtney Thank you all!
