Combination of hiphop and rap with lyrical ethics 8 MP3 Songs HIP HOP/RAP: Southern Style, URBAN/R&B: R&B Rap mix Details: Our name is the Officialz derived from sports in general. We were just sitting around and looking at other artists. All they had on were jersey's and tennis shoes with flashy jewelry. So, we decided to do our group as an officialz group with unity and dignity. We heard most adults talk about rap as something bad. Our attempt is to promote something good with the lyrics of our songs. We are new at this but that doesn't change our dedication to it. We love to listen to rap and we love to rap. We listened to Tupak, TI, Will Smith, 50 cents, Eminem, Biggy Smalls, JayZ, Luda, and a host of others. By listening to a variety of artists, we attempted to come up with our own style. We are not hard core or funny but a mixture of both. We are smooth and our lyrics make sense. The first album is just the beginning of a life long commitment to this type of music. We can sing and dance. Our shows are off the hook. We just need an arena to get this party started. We intend to party for a long time. So, jump aboard this never ending commitment to fun and goodtimes. Let's face it. We live and then we die. So, let's live; and while living love yourself, each other and our music. Thanks and keep our dream alive. The Officialz!
