Its no wonder 9 out of 10 online marketers are struggling Boost Sales Profits and Increase Leads Using Our New Marketing Software! Do You Own More Than Two Bonus Info Products? Read On! Dear Reseller, Im going to reveal to you what prompted me to create a fast and simple way to turn my computer full of PLR books into one of my best resources and sources for new leads to grow my lists and how you can benefit over and over from my idea I dont know about you, but my computer is just about filled up with free ebooks, and bonus products with giveaway or resell rights, that I had no idea what most

of them were even talking about anymore! Do you know how frustrating it is having to search through tons of products with resell rights to find quality ones to build your list or enhance a sales offer? All this information to profit from, but too many books to remember to really figure out how to use them to my advantage! At first I attempted to organize all the info products that I could resell or give away as a bonus into an excel sheet, and different computer folders, but eventually that became too complicated and sloppy Not to mention it didnt help the fact I couldnt remember what most the books were about! It also doesnt help that lately it seems everyone and their mother is giving us a dozen bonus items each time we purchase something, making it harder and harder to keep track of what ebooks are about what, or giving what kind of useful information! Dont even get me started on keeping track of Resell, Master Resell, and PLR rights! So I came up with a solution using my four years of college computer programming knowledge to solve the migraine this was causing me, and I know youll benefit from the solution even more: Introducing PLR Manager! (Windows 2000 or higher, Microsoft .Net Framework) Now You Can Take Advantage of This Time Saving and Profit Producing Software Too! So if you wish to benefit from the price as it currently

stands, and more importantly, before YOUR competition steals YOUR profits and customers away to their lists. Why buy software when I can just keep track of my own material in notepad or on a piece of scrap paper? One word: convenience. This software will allow you to simply and easily prevent you from wasting your precious time searching through packed folders of old information products that you can use as bonus materials or incentives to grow your list. Not only that, but it will allow you effectively organize notes on each product and recall in a single glance the value, niche, author, and whether the product comes with its templates for selling yourself. Oh, and then there's the fact that you can resell this pre-made and packaged software to generate more money yourself! Notepad and paper can't do that, now can it? Could I just partner up with someone else and purchase or receive the software for a lesser price or possibly free? Sure, however you would then miss out on large discounts on future releases and niche products that only people who order from me will receive! Future profit generating software delivered to you before public release and at a massive discount? Oh and then there are the PLR releases, Joint Venture and affiliate opportunities that only my customers will have access to! Can't beat that! Though your competition might beat you to more sales and email leads if you wait while they download it now! This is only the first of many niche related releases that will be released for you to profit from and grow your business greatly and at amazingly low prices for the exciting value and benefits. What about "market saturation" with everyone selling resell rights, how can I ever expect to benefit? This is a fair concern, and normally with your average ebook or mini report this would be a concern, but when it comes to software that saves people time and earns them money...saturation is hard to reach! Add to that the fact that you don't HAVE to sell or give any resell rights with this software, if you give it to your list or use it to draw in email leads, then you can declare it is for private use and alter the rights.txt file that comes with the package. However the concern is valid which is another reason why only 200 copies of this software will be sold! Some people will access the software while it's available and organize their business, improve their relationship value to their current customers by giving them access to this software, while at the same time increasing their sales and leads by using the software as a bonus or incentive to act now! The question is will you be one of them to benefit? But I don't own more than two products with resale rights and I don't have any bonus products on my computer to use in future sales... Well this software can help you in multiple ways then! Not only can you still use this software to organize future information you will obtain, but in the meantime you can build a massive list of potential customers

by offering them this software as an incentive! Better yet, if you currently have a list, or know people who do have products with resell rights...sell them this software and generate an easy passive income without busting a sweat programming the software yourself! It's a Win-Win at its finest! Though if you do own more than two books with resell or PLR rights, then you need this software to truly maximize the profit potential they have! Given the insanely low price of the Special Offer, and the fact that dinner for two would easily cost much more, the profit potential is too incredible to even doubt! Resell it, give it away to build your lists, combine it as a bonus to boost sales, you name it! Order Here Your vehicle probably costs twice as much to fuel up, and wont make you a cent!
