Elevator Rock 10 MP3 Songs EASY LISTENING: Soft Rock, POP: British Pop Details: The Fallen Leafs idea started in the autumn of 2004 by Tommie Enbom, Henrik Nilsson and Andreas Lindgren. After approximately one year of jamming together, mostly playing covers but also mixed with own material and ideas, the foundation of the Fallen Leafs was created. As the drummer Martin Ekeroth and the bass guitarist Jimmy Oscarsson joined the band in the winter of 2005 the Fallen Leafs dream was almost completed. We still have one part to make the dream complete and that is for our new 10 song debut album "First Leaf Fallen" to sell and sound as good as we want it to do. The band is now rehearsing atleast twice a week. And the sound is getting more and more heavy. We are lucky we have Henrik who soft things down a bit. We are making alot of new songs and are really enjoying our selves The debut album "First Leaf Fallen" only took 24 hours to complete and we are very proud of it. And it looks damn nice. So if you dont like our music, just buy the album as a work of art and put it on the wall ;)
