An analog electronic album. 12 MP3 Songs ELECTRONIC: Industrial, METAL: Industrial Metal Details: "E.P. was recorded in 1999-2000 at a studio in Tacoma Washington that has long since burnt down. I wanted to make a very unique sounding album so I decided to record the album on 24 track analog tape for a less digital feel. I also decided to use no computers on the album so what you hear is a few weird physical MIDI rigs I set up. The album is a lot like listening to very real sounding insturments doing impossible things. It was my first time in a real studio and I am proud of this very raw and weird CD." -Jake Alejo
