Generate Your Own Amazon Stores in English, French, And German! Maximize Your Amazon Affiliate Commissions And Skyrocket Your Google AdSense Profits By Generating Your Own SEO Amazon Stores in English, French German... With a Click of a Button! I have three very important questions to ask you. Question #1: Would you like to create your own Amazon stores, loaded with category products and keyword-related products of your choice, and "fully/heavily" armed with your affiliate links... with a click of a button? That's right! One click! I'm sure you'd like that. Question #2: Would you like to create your own Amazon stores jam-packed with hundreds and thousands of products, in English, French and German quickly and easily? Did You Know? Online Language Populations (Sept. 2004) Together, the online English, German and French markets constitute around 50 of all online populations! Rank #1: English: 35.2, Rank #5: German: 6.9, Rank #6: French: 4.2 The German market is very large, wealthy, and high-tech. It also has a large proportion of bilingual users who primarily search and browse in German but they are able to read English sites when they do find them, without the use of any translation software. The French-speaking world is probably even larger than the German one, with about 150 million

people spread around the world in many francophone countries. Question #3: Would you like to easily maximize your Google AdSense profits from your own multilingual, affiliate commission generating Amazon stores? You see... Google provides gateways for world internet users, which includes German and French. Google spider (the website indexing crawling tool of Google) crawls the web pages of your Amazon store. When it sees that the content is in German, it displays German AdSense. When it sees that the content is in French, it displays French AdSense. If you answered "YES!" to all three questions, then let me introduce you to an awesome software solution: Introducing... Multilingual Profit Generator!
