Generate 100 - Non-Obtrusive Pop-Ins! Skyrocket Sign-Ups Click-Throughs! Skyrocket Sales, Conversions, Sign-Ups to Your List(s) and Click-Through Rate Utilizing Powerful, User-friendly, Unobtrusive and Unblockable Attractive Multi-Shaped Pop-Ins! Pop-In Generator is a simple, effective and innovative software breakthrough! Important: Pop-Ins Are Not really Pop Ups! Let me ask you the most important question about Pop Up windows, ok? We all know that pop up windows are effective in increasing opt-in email list(s), conversions and sales, right? If that's the case, why do we have a zillion pop up blockers and why are pop up windows hated so much? I'm asking this question because if we can know exactly why and we do something about it, we'd sure have a new powerful internet marketing tool that is more effective and powerful than pop up windows! The answer in one word is... obtrusiveness. Obtrusiveness is defined as "noticeable or prominent in an unwelcome or intrusive way." Sounds like a definition of pop up windows, doesn't it! :) Pop up windows are hated because they are obtrusive and disturbing. The Pop Up War! Who's Side Are You On? The pop up windows open/appear in such a sudden way - blocking the reading view of a page's content - that many are simply fed up with them.

That's why pop up blockers, a solution for web users, were created. But internet marketers retaliated and created a solution to take care of pop up blockers: unblockable pop up windows. The Truth About Unstoppable/Unblockable Pop Ups! Let me tell you the truth about unblockable pop up windows. They are a smart solution, but for whom? Web users or internet marketers? Think about it Most people who have pop up blockers installed have one message for you: We dont want to see any pop up windows on our screen. Period! You see, unblockable pop ups only serve the needs of the webmaster/advertiser. Put yourself in the web surfers place. Lets call this surfer, Zorro. Zorro has a pop up blocker installed. Zorro is surfing the web, browsing websites and suddenly, on one of the websites (yours) a pop up window opens up a white rectangle with a window border (pop up content loading). Quiz Question: Whats the first thing thats going to cross Zorros mind and whats the first thing hes going to say and do? (a) Wow! Im very interested to know what this pop up window is all about!. And when the content loads: I won! A free subscription to a newsletter! WOW! Man, this is so cool! I have to subscribe now! Or (b) \$#\*#!@ @#\$#!!!! Damn those pop ups, even blockers cant stop them anymore! I'm sure you agree that the second reaction is going to be the most probable and likely one by web surfers as more and more internet marketers use, or shall I say abuse unstoppable pop ups. Let me tell you a fact: The Trend in Advertising Is Towards 0 Annoying Advertising Prediction: The trend towards 0 annoying ads and online intrusion is on the rise/bullish. If you're an internet marketer it's time you start thinking and aiming for 0 annoying/online intrusion advertising. The closer you can get to the 0 the more successful your advertising will be. The Ultimate Solution to Pop Up Windows for Both Advertisers/Webmasters and Surfers! On the basis of this trend, and as a result of continuously thinking 0 annoying 0 annoying, I created a new advertising solution that is so smooth and beautifully 'undisturbing' you wont believe! What we needed is the following: 1. Pop Up windows concept. A window that 'appears'. It it doesn't appear, it won't get any attention and it would become just like a banner. 2. Window that is unstoppable/ unblockable by pop up blockers. 3. A window that is unobtrusive to the surfer; should open without blocking what he's reading/viewing on a page. 4. Windows with attractive looking shapes 5. Windows with attractive backgrounds. 6. Windows that open in the right place. 7. Windows with timers to open in the right place at the right time. Other important features include: Setting delay time for Pop-In window before it appears. Duration/speed of the "Content Entrance" effect. If a Pop-In is located in the middle of a page and a person starts reading from the top, the Pop-In will not open until the person scrolls down to it/reaches it. There are infinite number of things
