

# Software You Can Pirate - Css Designer + Plr Rights

[DOWNLOAD HERE](#)

This software does not use I-frame code to design your webpages, it uses a little known technique of combining CSS with HTML that produces a search engine readable, scrollable content box that you can customize any way you want. I had just about give up hope on finding a way to minimize the visible appearance of "keyword targeted" content that I add to my pages to increase the keyword density, when I stumbled upon this code in a forum. Now the code I found was extremely basic, and to be honest I am no CSS expert, but I gave this code to my programmer and gave him the task of creating a software that would make it quick and easy to produce this code without very much effort or knowledge of code on my part. My programmer not only delivered what I asked for but he built in so many customizable features I did not even know was possible, and it took me less than a minute to produce the code to add to my pages! Your License to this Software \* Private Label Rights - You can sell, modify, and re-brand this software. Tags: plr
