

Algebraic Set Theory - , Ieke Moerdijk

[DOWNLOAD HERE](#)

This book offers a new, algebraic, approach to set theory. The authors introduce a particular kind of algebra, the Zermelo-Fraenkel algebras, which arise from the familiar axioms of Zermelo-Fraenkel set theory. Furthermore the authors explicitly construct such algebras using the theory of bisimulations. Their approach is completely constructive, and contains both intuitionistic set theory and topos theory. In particular it provides a uniform description of various constructions of the cumulative hierarchy of sets in forcing models, sheaf models and realisability models. Graduate students and researchers in mathematical logic, category theory and computer science should find this book of great interest, and it should be accessible to anyone with some background in categorical logic. Author: Joyal, Andri Author: Moerdijk, Ieke Publisher: Cambridge University Press Illustration: N Language: ENG Title: Algebraic Set Theory Pages: 00132 (Encrypted PDF) On Sale: 1995-09-14 SKU-13/ISBN: 9780521558303 Category: Mathematics : Logic
