Comes with two UNANNOUNCED BONUSES! Grab These 25 Brand New Premium Header Templates With Full PSD Source Files And Easily Create Your Own Awesome Headers In Minutes! What makes these header templates special? These 25 header templates are created in such a way that they can actually be developed further into 100's of different headers for different niches (if you wanted to do that). They're very versatile. All of the formatting, styling, and color combinations are already in place. The whole "design" part is done, so you don't have to have an eye for that sort of thing to create a great header. It's all done for you. You can:

- * Use these headers as is. Just change the text to your text, and maybe add an image of your own. And boom you have a killer header in minutes.
- * Play around with the colors and styles. Create your own color schemes to match your site. Move things around. Resize the header to you exact size. Customize just certain elements. And in just a few minutes you can have a fairly different and unique look.
- * Or just take certain parts you like from a header (like text or some effects or some layouts), and add them to any of your own existing graphics to spice them up. You get full source files to ALL these templates, and everything you see on the headers comes on its own layer. Here is exactly what you get in this package:

1. Layered PSD Header Templates. You'll get 25 premium header templates with layered PSD source files. The templates are all at least 900 pixels wide. I made them that size so that they're big enough for most sites, and you can easily resize them to any smaller size you want (like 800 pixels wide or 700 pixels wide). All of these templates come in source PSD files with editable layers. And since there are PSD files, Photoshop is preferred to use them, but you can also use them with any other program that opens layered PSD files (like Photoshop Elements or Gimp).
2. List of fonts used. You'll also get a full list of all the fonts used on these templates.
3. Video Tutorial. You will

also get a 20 minute video tutorial on how to edit the headers using Adobe Photoshop. I'll show you how to edit the text, change the color scheme, add your own images, and more. This isn't a full blown course on how to use Photoshop, but you will learn the basics for editing the headers with Photoshop.

BONUSES: **BONUS#1:** 21 Header Graphics Templates - FULLY Customizable!
