

Changing Alpine Treeline

[DOWNLOAD HERE](#)

The alpine treeline ecotone (ATE) is an area of transition high on mountains where closed canopy forests from lower elevations give way to the open alpine tundra and rocky expanses above. Alpine tundra is an island biome and its ecotone with forest is su EAN/ISBN : 9780080957098 Publisher(s): Elsevier Science & Technology, Elsevier Science Format: ePub/PDF Author(s): Butler - Malanson
