Laid back and easy does it sound. Tell you what, if you like the kind of music that is in your face, wants to take over the room, cannot be avoided, forces you to listen if you want to or not, then in all probality you will not like this music. But, 10 MP3 Songs EASY LISTENING: Mood Music, BLUES: Guitar Blues Details: The cd you are listening to or are looking at has been awhile in the process, one could say years. I hope you have enjoyed what you have heard, most of the songs are probably going to be a reflection of the mood I was probably in at the time it came out of me. Not always, but probably most of the time. Do not expect to see to much about me here, I am not good at self promotion, or as I like to call it bragging on ones self. That always seems like a quality I do not like in others, so I do not like it in myself. So do not expect to see a lot of self promotion. I would rather let the music do the talking, that is what you are here for. So, what I would prefer is that you listen to the music, if you find something about that you may like, great, and if you feel it is enough to make you want to purchase it, for that I am very grateful. Thanks Casey Dilworth
