Ethnically influenced breakbeat, 2step, electro - east meets west in a live mix by Denver's "lighthouse among the electronic music scene's collection of votive candles." 8 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: Breakbeat/Breaks Details: "Fluidynamics transcends the current construction of so-called "DJ music," blurring the line between beats and movement. Refreshingly, it's your mind that's moved first, but it isn't long before the rest of your body catches the rhythm. A unique and creative insistence is present throughout, and the music follows your pulse fast and steady. While much "DJ music" feels contrived, Fluidynamics breathes through each song with a surprising sense of imagination and originality. Listen with your head and feel your body move, move, move." - Scott Siders, Shades of Grey Productions and author of This Side of Oblivion
