

Mp3 Nina Goddess Of Dance - Dance Unlimited

[DOWNLOAD HERE](#)

Nina makes dance music for the happy dance crowds of the world. Enticing melodies and cool grooves unite in her unique neo-synthpop dance techno music. 10 MP3 Songs ELECTRONIC: Dance, POP: Bubblegum Pop Details: General Story: It all started out in february 2000. Before that I was only playing classical piano, and singing in choirs. My husband who had been fiddling with electronic music for years, threw me the mike and said "sing for me", and I sang.....I actually haven't stopped since :) Anyhow, my first song "Valentines day" went up the charts in the spring of 2000 and reached #9 overall on mp3.com. After all great response I couldn't just let go of it, so I made more songs. And even more songs...and then in the summer of 2000 I got a request for video photage. So in August I made my first video.! Also during the late summer my Shaking-Nina was made as a promotion tool. It got very popular and it was circulating through the web. Continuously featured on various sites especially popular on dutch sites. During the fall and winter the video was broadcasted on NOW TV and on several musicsites around. The NOW TV broadcast included a live phone interview too. One of my biggest media success was due to an article in Aftonbladet a major swedish newspaper. The article was in the IT section, which also was featured on their web page for as long as 4 weeks. (jan-feb 2001)That article generated several more articles for local magazines and even the region TV was at our house filming some studio recording and interviewed me. In feb 2001 I also made pro artist shots which can be viewed, (like the articles and my paintings) on my image page.... That's my story so far, I might not have included every event and it's far from ended, but I don't want to put any reader to sleep. :) Thanks for visiting my page, and feel very welcome to visit again, there are always new songs and albums in progress. Yours - Nina
