

Cell Engineering

[DOWNLOAD HERE](#)

List of Contributors.- 1. Caspase Regulation at Molecular Level.- 2. The BCL-2 Family.- 3. The IGF-1 Receptor in Cells Survival: Signalling and Regulation.- 4. Apoptosis in Hepatocytes.- 5. Programmed Cell Death in Plants During Development And Stress Responses.- 6. A Systems View of Cell Death.- 7. The Role of Caspases in Apoptosis and their Inhibition in Mammalian Cell Culture.- 8. Improvement of Industrial Cell Culture Processes by Caspase-9 Dominant Negative and Other Apoptotic Inhibitors.- 9. Therapeutic Small Molecule Inhibitors of BCL-2.- 10. Apoptosis Control Based on Down-Regulating the Inhibitor-of-Apoptosis (IAP) Proteins: XIAP Antisense and Other Approaches.- 11. Monitoring of Apoptosis.- 12. Molecular Imaging of Programmed Cell Death; From Basic Mechanisms to Clinical Applications.- Index. EAN/ISBN : 9781402022173 Publisher(s): Springer Netherlands, Springer US
Discussed keywords: Zelle (Biologie) Format: ePub/PDF Author(s): Al-Rubeai, Mohamed - Fussenegger, Martin
