I take sounds from all over the world and create electronic audio puzzles, ya dig. 7 MP3 Songs
ELECTRONIC: Experimental, WORLD: World Fusion Details: I am Joshi P, underground electronic music artist. I take sounds from all over the world and create avant-garde yet quite listen-able audio puzzles with a parody overtone. Treated flute, keys, cello guitars are fused with modern samples beats with lashings of noise disturbance and bizzare audio code and then crushed into a... song(?) My 1st solo album "Sokazi" is a 59 minute smearing of electronic commercial and experimental noise elements delivered with a tongue in cheek over tone. Sounds range from R&B, dance, 70's Hammond, noise, techno with heavy lashings of cyber garbage. Each song is a puzzle of beats and riffs turned into a strange yet listenable journey. Quality of sound is high, quality of content... you decide. All works are mastered by the best in the business with the latest techo mumbo jumbo equipment.
