

Mp3 Munich Syndrome - Sensual Ambience

[DOWNLOAD HERE](#)

Down tempo beats and atmospheric keyboards meet trip-hop jazz inflected piano and sax mixed with electronica, with a bonus EP of electro synth-pop. 13 MP3 Songs ELECTRONIC: Down Tempo, ELECTRONIC: Trip Hop Details: Munich Syndrome was born at an intersection where British German Electronic-Pop, A Grade B Sci-fi movie and the D.I.Y. attitude of punk and new wave (and a little David Lynch) collided for a dazzling moment of "What if..." A bedroom experiment that began with a couple of synthesizers, a drum machine and no expectations slowly gave way to more equipment (and for better or worse) some expectations. Evolving over time from a starker, analog-synth driven sound into a richer and fuller sound where production and the studio came into more prominence. Down-tempo beats and seductive dub-like bass lines underscore languid keyboard washes, jazz inflected pianos, sax and atmospheric electronica. Chill-out moods, cinematic soundscapes and warm melodies make up the essence of Sensual Ambience. Inventive arrangements and unique combinations of sounds create a complex but accessible journey in sound. Sensual Ambience opens and closes with Fragment (of a dream), instrumental bookends that go from mysterious trip-hop to a more full-blooded electronica. Between those two points are the atmospheric and introspective Quiet Atmosphere and Cathedral Interlude, the darkly sensual Lost In You and Sensual Ambience (Paris Movie) with the jazz influenced A Night In Paris, To Whom It May Concern and the Enigma-esque Endless Possibilities. Included with the first pressings are four bonus tracks, the Electro EP. Regret is the next step from Fragment and sets the stage for the less atmospheric and harder electro-pop that comprise the EP. Murderous inhabits a more aggressive sound mixing a modern-day Kraftwerk sound with William Orbit type electronics in a club-friendly mix. Come Out and Play is a Daft Punk-esque dance track utilizing a vocoded narrative. Closing out with Modern Age, a tightly sequenced bassline and a dark mood and a bilistering guitar solo

climaxing to an explosive finish. Munich Syndrome is an Electronic Pop band that exploring various musical styles from Down Tempo, Trip Hop, Jazz and Ambient to Synth-Pop, Dance and Electro.
