A truly original songsmith with a knack for quirky arrangements and catchy melodies (think Liz Phair x Dweezil Zappa), Glynn's new collection of indie pop songs spans any popular trends, past or present. 12 MP3 Songs POP: Quirky, ROCK: Modern Rock Details: "'To Sweeten Up' is one of the most original and magnetic albums I've heard from a female solo artist in years. Her music is as unconventional as that of Suzanne Vega but has the pop sensibilities of U2 or The Police, which makes for quite a compelling combination. Listen to songs like 'Money Retail Millionaires' or 'One Day Older' and take notice of their clever lyrics, catchy choruses and adroit musicianship. Glynn is both a critic's worst nightmare and savior. Someone sign this girl..." Evan James, American Songwriter "Her sound is so wonderfully peculiar... a pop-rock omnibus with unconventional undertones" Mercer Black, 512Magazine "'To Sweeten Up' appeals to the finicky listener who orders her pop with a side of intellect." Feedback Magazine "It's like U2 meets Dido." Broadjam reviewer "The 24-year old exhibits such songwriting moxie and confident command of her multi-instrumental talent that her band could be The Next Big Thing, or at least the Next Big Thing After That. . . .The song is so catchy, the performance so accomplished, I do a 'take,' eyes bulging and jaw dropping to chest." Rich Malley, Austin American Statesman
