Debut album for the Italian band that play a NuMetal/Gothic music . Ten song with a power sound and electronic parts . 10 MP3 Songs ELECTRONIC: Industrial, METAL: Gothic Metal Details: The TittytwisterS are born in the year 2000 in Livorno(Leghorn,ITA) from a group of friends: Jonny(guitar), Beppe(drums), Dani(voice) and a never defined bassist. With the introduction of Ele(voice) and Dani(bass+backvoice), the band recorded the first self made demo called DeMo 'n SiDe in the middle of 2002. The band made another demo in March 2003 with other 5 tracks, it's called Faerey's child but it wasn't published. After the leaving of Beppe, Led became part of the band and the first EP TittytwisterS was published. Now the band style is very different from the past. The crude crossover style now is much more melodic using electronic and symphonic sounds, a musical voice with the same old heavy instrumental parts. The first result is in the silvery waters, the new album out the 15th of April 2006.
