

Advances In Dynamic Game Theory And Applications

[DOWNLOAD HERE](#)

1;Contents;6 2;Preface;10 3;Contributors;18 4;PART I Dynamic Game Theory;24 4.1;Differential Games Through Viability Theory: Old and Recent Results;25 4.2;Differential Games with Impulse Control;58 4.3;On the Instability of the Feedback Equilibrium Payoff in a Nonzero-Sum Differential Game on the Line;77 4.4;Constructing Robust Control in Differential Games: Application to Aircraft Control During Landing;88 4.5;Games, Incompetence, and Training;112 4.6;Stackelberg Well-Posedness and Hierarchical Potential Games;130 5;PART II Stochastic Differential Games;148 5.1;Ergodic Problems in Differential Games;149 5.2;Subgame Consistent Solutions for a Class of Cooperative Stochastic Differential Games with Nontransferable Payoffs;171 6;PART III Pursuit-Evasion Games;189 6.1;Geometry of Pursuit-Evasion Games on Two-Dimensional Manifolds;190 6.2;Solution of a Linear Pursuit-Evasion Game with Variable Structure and Uncertain Dynamics;212 6.3;Pursuit-Evasion Games with Impulsive Dynamics;240 6.4;Approaching Coalitions of Evaders on the Average;265 7;PART IV Evolutionary Game Theory and Applications;285 7.1;Adaptive Dynamics Based on Ecological Stability;286 7.2;Adaptive Dynamics, Resource Conversion Efficiency, and Species Diversity;302 7.3;Evolutionarily Stable Relative Abundance Distributions;319 7.4;Foraging Under Competition: Evolutionarily Stable Patch-Leaving Strategies with Random Arrival Times. 1. Scramble Competition;341 7.5;Foraging Under Competition: Evolutionarily Stable Patch-Leaving Strategies with Random Arrival Times 2. Interference Competition;363 7.6;Evolution of Corn Oil Sensitivity in the Flour Beetle;380 7.7;The Evolution of Gut Modulation and Diet Specialization as a Consumer-Resource Game;390 8;PART V Applications of Dynamic Games to Economics;404 8.1;Time-Consistent Fair Water Sharing Agreements;405 8.2;A Hybrid Noncooperative Game Model for Wireless Communications;423 8.3;Incentive-Based Pricing for Network Games with Complete and Incomplete Information;442 8.4;Incentive Stackelberg Strategies for a Dynamic Game on Terrorism;470 8.5;Capital Accumulation, Mergers, and the Ramsey Golden Rule;498 8.6;Economic Growth and Process Spillovers with Step-by-Step Innovation;517 8.7;Supplier-Manufacturer Collaboration on New Product Development;537 8.8;A Differential Game of a Dual Distribution Channel;556 8.9;Design Imitation in the Fashion

Industry;578 8.10;Formulating and Solving Service Network Pricing and Resource Allocation Games as Differential Variational Inequalities;596 9;PART VI Numerical Methods and Algorithms in Dynamic Games;624 9.1;Numerical Methods for Stochastic Differential Games: The Ergodic Cost Criterion;625 9.2;Gradient Transformation Trajectory Following Algorithms for Determining Stationary Min-Max Saddle Points;646 9.3;Singular Perturbation Trajectory Following Algorithms for Min-Max Differential Games;665 9.4;Min-Max Guidance Law Integration;685 9.5;Agent-Based Simulation of the N-Person Chicken Game;701 9.6;The Optimal Trajectory in the Partial-Cooperative Game;710 EAN/ISBN : 9780817645533
Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Spieltheorie (mathemat.) Format: ePub/PDF Author(s): Jorgensen, Steffen - Quincampoix, Marc - Vincent, Thomas L.
