

Computational Earthquake Physics, Part II

[DOWNLOAD HERE](#)

This second part of a two-volume work contains 22 research articles on various aspects of computational earthquake physics. Coverage includes the promising earthquake forecasting model LURR (Load-Unload Response Ratio); pattern informatics and phase dynamics and their applications; computational algorithms, including continuum damage models and visualization and analysis of geophysical datasets; and assimilation of data. EAN/ISBN : 9783764381318 Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Erdbeben Format: ePub/PDF Author(s): Yin, Xiang-chu - Mora, Peter - Donnellan, Andrea
