

# Intraoperative Neurophysiological Monitoring

[DOWNLOAD HERE](#)

1. Introduction- SECTION I: PRINCIPLES OF INTRAOPERATIVE NEUROPHYSIOLOGICAL MONITORING- 2. Basis of intraoperative neurophysiological monitoring- 3. Generation of electrical activity in the nervous system and muscles- 4. Practical aspects of recording evoked activity from nerves, fiber tracts and nuclei- References to Section I- SECTION II: SENSORY SYSTEMS- 5. Anatomy and physiology of sensory systems - 6. Monitoring somatosensory evoked potentials- 7. Monitoring auditory evoked potentials- 8. Monitoring visual evoked potentials- References to Section II- SECTION III: MOTOR SYSTEMS- 9. Anatomy and physiology of motor systems- 10. Practical aspects of monitoring spinal motor systems- 11. Practical aspects of monitoring cranial motor nerves- References to Section III- SECTION IV: PERIPHERAL NERVES- 12. Anatomy and physiology of peripheral nerves- 13. Practical aspects of monitoring peripheral nerves- References to Section IV- SECTION V: INTRAOPERATIVE RECORDINGS THAT CAN GUIDE THE SURGEON IN THE OPERATION- 14. Identification of specific neural tissue- 15. Intraoperative diagnosis and guidance in an operation- References to Section V- SECTION VI: PRACTICAL ASPECTS OF ELECTROPHYSIOLOGIC RECORDING IN THE OPERATING ROOM- 16. Anesthesia and its constraints in monitoring motor and sensory systems - 17. General considerations about intraoperative neurophysiological and monitoring- 18. Equipment, recording technique and data analysis and stimulation- 19. Evaluating the benefits of intraoperative neurophysiological monitoring EAN/ISBN : 9781441974365 Publisher(s): Springer, Berlin, Springer Science & Business Media Format: ePub/PDF Author(s): Miller, Aage R.
