

# Mp3 Stephanie Bennett - He Sent Jesus To Rescue Me

[DOWNLOAD HERE](#)

This music style is designed to help heal hurting people. Anointed praise, worship and filled with the Holy spirit. 12 MP3 Songs GOSPEL: Contemporary Gospel, GOSPEL: Traditional Gospel Details: I joined the Baptist Church and Choir at the tender age of 8. I just loved singing and hamonizing with the older folks on Sunday morning! During my teen years, my love for gospel music began to grow. I sang in talent shows, beauty pageants, plays, civic events, weddings and funerals. My love for gospel really soared in the 90's. I had a burning, almost nagging, desire to compose and sing what was going on inside me. My greatest challenge was the fear of exposing myself and becoming transparent. I wrote, sang, but no one yet heard. So I decided, to burn a CD. Late in the summer of '95, I met a beautiful, Chritian man, Steven Bennett, who helped my dream become a realtiy. Steven, who is now the president and founder of our company, took a job as Cheif of Police at Joliet Junior College to help out with the monetary part of the dream. It was hard but we forged our way together. The dream was completed yet still in it's infancy in September of 2000. Since we had no recording experience, we hit a ton of road blocks. We are now proud to say that we have a full, professional quality CD for your listening pleasure and spiritual enrichment. I pray that you listen and identify with the words; I pray that you listen and let the music speak to your heart. These songs are straight from the heart fresh out of my experience. I pray that you experience the comfort, the love and the warmth that I felt while composing them. There's an old saying that I really, really like! It describes who I am and the reason God put me here.....It's simply this, "IF I CAN HELP SOMEBODY AS I PASS ALONG, THEN MY LIVING SHALL NOT BE IN VAIN!" I will be taping the TBN Praise The Lord Program on May 14, 2004. Please check local TV listings for the TBN station in your area. Exact date program will air, will be listed, when I find out.
