Ambient/Dance style 12 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: Ambient Details: Multiverse: I tried to make this album a little more suitable for the clubbing scene without it losing my own distinct style of writing music. 1 Telepathic girl: was inspired by a chance meeting with a mystery girl on a train. Although we never spoke, we seemed to have a rapport, like an unspoken, mysterious inner connection with each other. 2 Soul bird: Has a similar tune to Timepiece with a faster "dancy" beat, describing our complicated flight to rediscovering our true Self. 3 Portal: This deep song tells of an imaginary flight through space and portals, to undiscovered worlds and civilizations, while echoing whispers promise an adventurous encounter with a new collective of light beings. 4 Migration: As the title describes, it's about the flight of birds and what I imagine being part of a flock would sound like. It is also about my continuous inner journey, the soul birds flight to the Source and the love in my heart. 5 Ancient Call: Captures ancient atmospheres sometimes heavy and deep 6 Timepiece: is a drifty, boppy and uplifting song with heavy vibe of a concrete suburbia atmosphere running through it. 7 Atlantic Influence: This track figuratively describes vast expanses of water, spaces and civilizations. The passionate fast beat tells of countless adventures. 8 Native Legacy: A fast track, uplifting with a native undertone. 9 Time travel: This song suggest the possibility of time travel to the past and future. 10 Star field: Cosmic journey through infinite galaxies within myself. 11 Divine Intervention: Has more a fast "dance beat" to it and us wanting to connect to a Divine influence and calling for an intervention. 12 Dolphins Kiss: Swimming in a deep and strange underwater world with unfamiliar sounds, pretending to be a playful dolphin.
