Quirky, inventive and acoustic storytelling folk-fusion. 14 MP3 Songs in this album (33:38) ! Related styles: FOLK: Alternative Folk, ROCK: Acoustic People who are interested in Beck Crash Test Dummies Dave Matthews should consider this download. Details: Here's what others say: "This music has found its way into a folk genre but truly, it is something otherworldly. It really seems like music that, like a parade or a circus, found its way out of a very dark forest into the light sometimes leaving members still wanting to emerge from the shadows..." "This guy's songs are bouncy, breezy, and folksy without being corny..." "...interesting storytelling songs...can't quite place it." That being said, I pride myself on originality. I try never to write a boring love song, even worse would be to do it multiple times. Instead - I hope to wander into unexplored territory with each song. Two artist I really respect for originality are Brad Roberts from the Crash Test Dummies, and Joanna Newsom - never once will you hear a similar theme and/or boring idea - that is what I strive to do. One Wrong Step - is a live album. Two Red Herrings - is a studio album. Please read along with my lyrics - the digital booklet is free at: adriangrey.com/tworedherrings All egocentric and/or "ME" stuff - is at: adriangrey.com Thanks a gazillion for your support, AG
