Dynamic electronical music from Sagi Productions. 1 MP3 Songs in this album (4:03) ! Related styles: ELECTRONIC: Techno, ELECTRONIC: Trance People who are interested in Moby Vangelis Jean Michel Jarre should consider this download. Details: Ari Inkiläinen was born in 13th of December 1971, in Finland. He was interested of music already in a basic school and when was just a kid then most of all his biggest target was rhythm instruments and more like the global instruments than the basic ones. Also at that time the big interest came to the keyboards and synths, as he got older which based on to the influence of other artists. During his teens he did expand his interest for electronic music and was very taken by the synth music. He travelled at his teen times a lot around the world and in many countries and took influences of other cultures for his cultural life and for his own growing art life. He also lived the longer period in England. From there he bought his first synths and drum machine. The first works were very experiential ones. Samplings of other artists and searching the different kind of soundworlds that comes out of synth keyboards. That studying and working gave him more wind under wings and to write more of own material than copy of anybody else or play just cover songs and the present works started to shape up to their style out what they are now, own kind and unique, different kind from others work and from modern style and that did lead to the present time works. He has studied and taught himself to play the keyboard. From his nature and innerside comes the linking point to the classical music and with the rendezvous of the synthesizer world, from those aspects arises the works of his. He also does find the Finnish nature to effect on his works too and also some classical compositions has been born. Works for strings, choirs many other instruments too than for the electronic instruments and links for them can be found from Finnish nature. The composer also owns the literary side and also writes poems and lyrics at the side as he composes music. At the age of 36 he continues in Finland where he lives now and

behind the synths he stays. The worlds of electronic music are to be shown for the public as the images of electronic music and sights of inner world.
