USA This recording is very diverse, covers a wide spectre of styles and would be appealing to a wide audience. Sound production is of a superb quality and masterly done. John uses his midi devices expertly and to the full extent. Musically, this whole recording is "on high" - easy

listening, "happy" tunes and toe tappers. John has built (over the years) his very individual performing style: technically sound, he performs with a lot of charm. To see his Live Show is quite an experience too.
