KiloWatts, aka James Watts, is a native of Dallas, TX, but currently resides in Philadelphia, Pennsylvania.

He began as a young lad playing the piano, took up making music with trackers during his teenage years, and has since continued exploring digital expressionism via electronic music. He is one half of KiloWatts

Vanek, of Holophon Records in Germany, a glitch-pop project with wide appeal. He is a part of Artificial Music Machine, based in Austin, TX, with which he creates his most intricate and thoughtful work. He is a

staunch supporter of file sharing, and played a part in the setup and launch of Soulseek Records.

Musically, he likes to move you emotionally with deep vaporous melodies, annoy you purposely with noisy musical dishevelment, and entertain you with an irresistible pop appeal - but not all at the same

time. He enjoys a distinct storytelling quality within his music, almost as much as making asses move.

There are worlds to be explored in his ever growing body of work.
