Semi-Experimental electronic music. 6 MP3 Songs ELECTRONIC: Drum 'n Bass/Jungle, ELECTRONIC: Experimental Details: Low-fi Sonic Distortion is an experimental electronic project that explores patterns, combinations, and multilayered thinking. When working on a Low-fi Sonic Distortion piece Giles spends many hours building the composition to one place, just to tear it apart when he sees other possibilities. Folding these new possibilities into the old ones reveals even more potential. This process is what Low-fi Sonic Distortion is about. There is never a finished project, just occasional snapshots when the music reaches a moment that feels right.
