My music has been featured on garageband and has also appeared within the top ten on Amazon's Free Celtic New Age - mp3 download section. My keyboard music ranges from New Age, Ambient, and Easy Listening to Standalone Piano and Electronic Classical. Some of my tracks contain Celtic Medieval influences, genres I also thoroughly enjoy exploring with modern keyboard voices. I've been influenced by artists like: David Arkenstone, Tangerine Dream, George Winston, Enya, and countless other independent, online musicians. Castle Lore itself represents a 3 year labor of love. It expresses many musical influences in my life, from orchestral, to celtic flavored melodies, and songs with a modern/medieval twist. Each track has a background story to it, and I also encourage the listener to drop by my own site for the latest news and info. Those who purchase my cd will have access to liner notes online at my web site. On each track, you'll hear a natural performance. Every note is my hand on the keys, recorded directly. I wanted you to feel my passion for these songs as much as possible. Each is a story, leading you on a musical journey to faraway lands and distant places. I hope you enjoy!
