

Stardust, Supernovae And The Molecules Of Life

[DOWNLOAD HERE](#)

From the contents: Introduction.- In the beginning.- What is Life .- The Miller Urey Experiment.- General background and definitions.- What is the origin of the elements?.- The big bang.- Big bang nucleosynthesis.- Stellar nucleosynthesis.- Creation of molecules in the interstellar medium.- The electromagnetic spectrum.- Detecting photons of different energies.- Secrets from meteorites.- Mining the comets.- Amino acids and Chirality.- A Primer on Amino Acids.- Chirality and Polarization.- Relating Optical and Molecular chirality.- The other molecules of life.- How have scientists explained the amino acid chirality?.- Models that produce chirality.- Amplification via chemical catalysis.- Laboratory experiments.-Terrestrial amplification.- Concluding remarks.- What happens to the amino acids when the supernova explodes?.- The supernova.- The neutrino story.- Interactions of neutrinos with ^{14}N .- Relating the ^{14}N spin to the molecular chirality.- The supernova progenitor star.- Spreading chirality throughout the galaxy and throughout the Earth.- Might supernovae process all the amino acids in the galaxy?.- Spreading molecules and enantiomerism throughout the galaxy.- Testing the models of amino acid chirality.- The impact of amino acid chirality on questions of the origin of life in the universe.- Are we alone?.- Glossary.- Index.- References. EAN/ISBN : 9781461413325 Publisher(s): Springer, Berlin, Springer US Format: ePub/PDF Author(s): Boyd, Richard N.
