(You can skip this if you have already uploaded your site using another FTP program). The software will then automatically keep track of all your web site files on your PC. When you add, delete or change any files, Child's Play FTP will make the same changes to your web host automatically. ***** Product# 2: Affiliate Diamond - With Master

Resell Rights: Increase Your Affiliate Commissions Automatically! Affiliate Diamond provides a quick and easy fix for one of the biggest problems facing affiliate marketers. The problem arises when instead of simply clicking on your affiliate link, a customer copies the link into the Address field at the top of their browser and modifies the link before using it. This modification comes in two forms - chopped links and stolen commissions To illustrate this, take a look at this typical affiliate link:

salessite.com/affiliates.php?r=1234 This link is for a web site "salessite.com" and an affiliate ID of 1234.

The Chopped Link- For no good reason other than simply to stop you getting commission, a surprisingly large number of people will chop off the affiliate part of this link before using it, leaving just salessite.com.

The Stolen Commission- Some people will sign up to the affiliate program themselves, then change the 1234 to their own affiliate ID before buying the product. The result is that YOUR commission gets paid into THEIR account. This is common for products sold with high levels of commission, such as most ebooks and software. In both these cases, you lose a commission that should rightfully be yours. Using your copy of Affiliate Diamond, you can avoid this problem, automatically with just a few button clicks, substantially boosting your affiliate commission checks. *****

Product# 3: Download Page Protector - With Master Resell Rights: Stop Thieves From Stealing Your Software And Ebooks! If you sell ebooks or software, you will almost certainly know about the problem of theft. Lots of people will try to gain access to your product download (or thank you) pages without paying, in order to steal your ebooks or software. People usually do this by trying to guess the name of your download page. You probably already reduce this risk by giving your download page a name that is hard to guess. However tests have shown that some people will spend up to an hour trying to guess their way into a download page. Some now even use special hacking software, left to run overnight automatically trying millions of permutations to guess the name of your download page. The fact is that simply giving your download page an unusual name is no longer an effective way of stopping those determined to steal your products. Download Page Protector quickly and easily protects you from this problem, by automatically adding special code into your download page. This requires a security code to be included in the link for the download page, making it much harder for someone to steal your products.

***** Product# 4: Spambot Guardian - With Master Resell Rights: Stop Spammers From Grabbing Your Email Address! Most webmasters include their email address on the web site, so visitors can contact them. These are usually in the form of "mailto" links, allowing visitors

to click on the link to send an email. Unfortunately spammers are also on the lookout for these email addresses, as targets for spam. Spammers use special web robots called Spambots which search continually through millions of web pages, looking for email links. When a Spambot finds an email link, the email address is added to a database, to be used for spamming by the owner and to be sold to other spammers. Spambot Guardian will instantly protect your entire web site from Spambots. It scans all your web pages on your PC (before you upload them) and encrypts any mailto links automatically, leaving them unreadable by Spambots but still fully usable by your visitors.

***** Product# 5: Weblink Checker - With Master Resell Rights:

Check For Broken Links On Your Websites! When you are creating or updating your web site, it is all too easy to accidentally create a broken link. A broken internal link can not only potentially lose you visitors and sales, but can even have an effect on your search engine ranking. Weblink Checker is a very simple tool which instantly checks your web site on your PC before you upload it to your web host. Simply select the file corresponding to your home page and the software will instantly spider your site on your PC, checking every internal link and giving you a detailed report, so you can easily fix any problems!

***** Product# 6: Easy Resell Plus - With Master Resell Rights: Save Time And Effort In Customizing Ebook Mini Sites! If you run an ebook reselling business, you need lots of products to sell, with new ones added regularly. This can mean a lot of work in getting all the supplied mini sites set up with your payment details. Easy Resell Plus is an easy to use software tool which will automate the most difficult part of this process for you.

***** Product# 7: Affiliate Customizer - With Master Resell Rights: Help Your Affiliates Sell More Of Your Products! If you have your own affiliate program, you probably create readymade adverts for your affiliates. Your affiliates need to customize each of these adverts with their affiliate link and possibly other details such as their name and contact details. Each time you release a new advert, your affiliates have to spend time and effort looking up their affiliate link or ID and modifying the advert by hand. If you could automate this process for them, you would not only save them time and effort, but also reduce the chance of them making expensive mistakes. Affiliate Customizer is a simple tool which will customize your adverts in seconds. Your affiliates simply fill in a short form with their details and the software will automatically customize your adverts for them, ready for use.

***** Product# 8: Form Protector - With Master Resell Rights: Protect Your Forms From Hacking Attacks! You will almost

certainly have at least one HTML form on your web site. Depending on the purpose of the form, they are vulnerable to a wide variety of attacks. If you run a traffic exchange, a pay per lead site, a site with a top or anything else which uses a form to monitor or reward visitors, you are vulnerable. Your competitors and visitors can read the HTML of your form simply by viewing the source of your pages then use the information to cheat, steal or otherwise take advantage of you. Automatically encrypting your forms with Form Protector will help protect your site from these attacks. *****

Product# 9: Frame Buster - With Master Resell Rights: Stop Other Webmasters From Misusing Your Content! Many web sites will show your web pages inside a frame, when they link to your site. While for some web sites this can be acceptable, or even desirable, this framing can be abused by some webmasters. Frames can be used to place distracting headers on your site, reducing the impact of your site and encouraging visitors to navigate through someone else's links instead of yours. In some cases, webmasters have even used this technique to pass off another site's information pages as their own. Frame Buster will automatically protect every page on your entire web site with a single button click, by inserting special script which un-frames your pages automatically.

***** Product# 10: Mini Site Customizer - With Master Resell Rights: Make More People Use Your Readymade Mini Sites! If like many online marketers, you create single page mini sites for other people to customize and use, you will find this tool invaluable. All mini sites require customizing with the persons affiliate or payment links, name, email address etc. Mini Site Customizer is a simple tool which can automatically scan an HTML page for special "customization tags", presenting a simple form to allow the mini site to be customized easily in seconds. By distributing Mini Site Customizer along with your mini site, you'll make it quick and easy for others to use your mini site, substantially increasing its appeal. ***** Here is A Summary of
