Pioneering their patent heavy dance style, Raven Music is back with more Hi-NRG anthems, more melody and more metal-fused mayhem. Electronica like youve never heard it before. 12 MP3 Songs

**ELECTRONIC: Dance, ELECTRONIC: Trance** Details: After almost five years out of the game, Raven Music is back pioneering its trademark style of Hi-NRG dance and infectious melodies. An edgier production, Attack! also heralds Ravens unique heavy dance method, melding metal and dance together for some truly earth-shattering tracks (see track breakdown below). Incorporating live guitar and an electronica mix that is both eclectic and original, youll be hard-pressed to find a more unique release this year.

**Track Breakdown:**

- 1) Raven Theme An introduction to the madness within, Theme is just the beginning
- 2) Shake It Like the title, this mix of metal and melody is sure to get you movin. With some of the catchiest vocal samples on the whole album and fearsome guitar-work, its dance like youve never heard it before.
- 3) Creep 'The' heavy-dance anthem. Combing a soaring Prophet synth-line with a rock-hard bottom end, Creep is essentially two tracks in one. Epic.
- 4) Lift If you want to get that party rockin, send this through your speakers. Featuring a super-heavy breakdown and infectious leads, this is one song that'll lift you up.
- 5) Sorry Sorry drops the 4/4 in favour of something a little more down-tempo. With one of the widest appeals on the album, this is definitely a track that appeals to all tastes.
- 6) Vertigo Exotic trance from the furthest reaches of the psyche, Vertigo also includes trippy tapping lines and monster build-ups. Dont forget the surprise finale
- 7) Kick It Minimalist rock meets dark-style in a mashed-up mix of hypnotica. Tune it, sit back and listen to those super-synths soar!
- 8) One A house-esque blend of vocal hooks and synth-pop make this number one of the most accessible on this release.
- 9) Thriller A lost track discovered after the original masters were stolen in 2005, Thriller is a fast-paced journey to the future riding on the production of old. Be sure to check out the killer

break-beat/metal conclusion. 10) Contortion Hard-house at its skull-crushing finest. Fusing tribal trance with heavily processed 303s, if this doesnt get your toe tappin' away, nothing will. 11) Vanilla Ice Taking the tempo down a step, this track is icy-cold. Haunting and melodic all at once, it is a tale told by twin guitars. 12) Switch Get your blood pumpin with Switch. A blockbuster of big beats and melodic hooks, it takes power trance and blows it out the water.
