

Nitrogen-fixing Leguminous Symbioses

[DOWNLOAD HERE](#)

"This is the final volume in a comprehensive seven volume series on all aspects of nitrogen fixation, one of the key biological processes on the planet and still a major provider of nitrogen in agro-ecosystems. A wide range of topics is presented in an easy to read style, with good clear diagrams and figures. This is a well-written comprehensive text, with extensive bibliographies, that will be useful to students and academics at all levels, and is to be recommended strongly." (Ron Wheatley, Experimental Agriculture, Vol. 45, 2009) EAN/ISBN : 9781402035487 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Dilworth, Michael J. - James, Euan K. - Sprent, Janet I.
