The next time you create your own podcast or vlog! Podcasting or vlogging can be loads of fun when you are doing it just to play around... But if you are creating audio or video for your professional website... Don't sound umm like uhhh a dork that can't remember what the heck umm they are trying to uhhh say! Do it like a real PRO with Podcast Teleprompter starting today! Tuesday 9:12 am Dear Friend, Podcast's and Vlog's are a pretty incredible new technology, aren't they? If you're like me, you've probably thought about doing some Podcasting of your own. Maybe you've taken the first step and done a recording. I did that, too, and I was really stoked about it until I played it back. It went something like this: Uhyeah this is Stan. Stan. I'm gonna review this CD from no, wait, it's a DVD. OK, I'm reviewing the latest, uh, DVD from Coldplay Oh, THAT was impressive. Yeah, right. Like I'd want to send that out over a Podcast or Vlog, with all the ums and ahs. No way, Jose. But then I got an idea. Suppose you could use a simple tool to edit out all the ums and ahs and do-overs. Imagine you do your Podcast or Vlog, talking just like you normally do without having to be self-conscious or think about what to say. Then you use a simple tool to smooth it all out so it sounds like a pro recorded it. Sounds too good to be true? Well, it isn't if you have the right tool. Think about it. The ability to edit and delete could make you into a Podcast or Vlog star overnight. But cleaning up recordings is the hard part. You could pay a sound engineer to clean up your Podcast, but it would cost you a lot of money. Those guys make at least \$50 an hour. But instead of paying some sound engineer a fortune OR trying to read from a script (which sounds fake anyway), what if you had Podcast Teleprompter Finally! A way to quickly and easily make every Podcast or Vlog you make sound just like Anderson Cooper on CNN or someone like him recorded it. If you have always wanted to be able to quit
