

Sintering

[DOWNLOAD HERE](#)

Sintering process studies have re-emerged strongly in the past decade due to extensive discussions about the stabilization of nanoparticles and nanostructures, and the development of controlled nanograined bulk materials. This book presents the state-of-art in experiments and theory of novel sintering processes, traditional sintering and grain growth. The scope ranges from powder metallurgy to ceramic and composites processing. The challenges of conventional and novel sintering and grain growth in nanopowders and nanostructures are addressed, being useful for students as well as professionals interested in sintering at the nanoscale. EAN/ISBN : 9783642310096 Publisher(s): Springer, Berlin Discussed keywords: Sintertechnik Format: ePub/PDF Author(s): Castro, Ricardo - Benthem, Klaus van
