Like I said before, I've got a bit of a reputation for knowing how to make money online and I work very hard at making sure that is justifiably earned. When I was starting out, I was little more than a chicken running around without its head. I was buying this eBook and watching that video, trying to soak up as much information as I could before putting anything into play. When I felt like I had learnt enough information to begin, I still had no clear cut strategy. I was building AdSense sites, selling affiliate products and marketing resale rights. I was doing anything I could to make a dime and I wasn't even making may of those. I was working 60 hour weeks and not earning much of anything. I felt like I was swimming upstream, but most of all, I felt like I had no direction for what I should be doing. Every night I'd start a new internet marketing project without giving any thought to why the previous night's project didn't work. I was more focused on following the letter of the laws than customizing the methods to work with what I was doing. I was working too hard and showing no results at all. It Was Then That I Discovered The Power Of Internet Video. I was reading a letter for an internet video product, much the same way you are reading this letter right now, and a light clicked on in my head. I realized then and there that to make money online, I couldn't be rehashing the same old ideas that people have been using for years. If I wanted to make money, and I mean real money, then I needed to be adventurous and willing to try the newest ideas. To confirm my idea, I quickly rounded up every eBook and video series that I had been using as a guide and looked at the copyright on them. Just as I thought,

not one product had the current year's copyright date on it. It was at that moment that I realized how foolish I had been. I promised myself to start taking risks online and that I wouldn't live by conventional wisdom anymore. That very day I started creating videos. I started posting them and circulating them around. I wasn't very surprised when the videos weren't effective. I knew they needed to be modified and customized exactly right to work. This is when my life started to turn around. I spent months finding the right way to make money online with videos and I'm telling you, the night where I started making the type of money I had hoped I could was one of the best nights in my entire life. You Can Make The Type Of Money That You Hope As Well. Let Me Show You How... Video Profits will take you deep within the underbelly of the internet marketing world and show you how to make your traffic do whatever you want them to do, all with the power of video. You will learn how the structure of video websites like YouTube, Yahoo! Video and MetaCafe are perfect for online marketing...if you know how to take advantage of their system. You will also learn what the important differences are between amateur videos, amateur-looking videos, professional-looking videos and professional videos. You'll learn how to use each different kind of video and in what situations you should use which style. Video Profits will also show you how important video branding is and why if you have never heard of the term before, you are leaving money on the table.
