

Induced Pluripotent Stem Cells

[DOWNLOAD HERE](#)

From the contents: Introduction.- Pluripotent Cells.- Pluripotent Cells.- Transcriptional Networks and Signaling Pathways of Pluripotency.- Induced Pluripotent Stem Cells (iPSCs).- Generation the First iPSCs.- Reprogramming.- Molecular Mechanisms of Pluripotency.- Steps in Reprogramming.- Mechanisms in Reprogramming.- Dynamics of Direct Reprogramming.- Epigenetic Modifications.- Similarities and Differences between iPSCs and ESCs.- Modeling Disease in a Dish.- Disease Specific iPSCs.- Choosing Cell Sources.- Identification of iPSC Colonies.- Characterization of Genetic Mutation.- iPSCs Differentiation into Desired Cell Types.- Challenges to Therapeutic Potential of Human iPS Cells.- Is Reprogramming Necessary for Regenerative Therapies?.- New Approach to Understand the Biology of Stem Cells.- Health vs. Disease.- Changed Paradigm: Reprogramming as Rare but Robust Process.- From Reductionism to Wholeness.- More Future Considerations.- Conclusion. EAN/ISBN : 9781461422068 Publisher(s): Springer, Berlin, Springer, New York Format: ePub/PDF Author(s): Yildirim, Sibel
