Portal's first EP, 'A Taste of Things to Come...' offers just that - a taste of the intensity and complexity that this talented new band will have to offer in the years to come. The album was recorded, produced, and engineered at Pitchwhyte Studios in Edmonton by lead singer/songwriter Kenton Thomas. It offers a wide range of sounds, from industrial to electronic-metal hybrid, to straight up hard rock. More concerned with writing intelligent, well crafted compilations, Portal takes its influences from a wide range of talented artists such as Nine Inch Nails, Tool, Finger Eleven, Filter, Deftones, Soundgarden, Dream Theatre, Red Hot Chili Peppers, and many others.
