" Do you remember the Burning Star? Those that came before us. Our idols and inspirations. This Cd is dedicated to them. Can you hear them playing within?" Now the fifth release from Scott M. Rifkin and The Exploration Project- THE BURNING STAR. Almost 70 minutes of new music; featuring lots of Keyboard/Synthesizer and some Guitars. The seven soundworlds presented here are bold but with structure. People should detoxify themselves musically before taking this journey! Normal rules don't apply here! Now that I have some new production capabilities, I can create my own artwork, labelling, and disc design. I still haven't mastered the shrink wrap thing though! So I have signed or initialed the inner insert of each of the first five cds offered here. I have also retaped each Cd closed. I am sure you would

not complain about such matters; with also 70 minutes of music to listen to and the rather cool Cd design coverings. Hey Man, by the way, there are 5 or 6 other The Exploration Project Cds on sale on CDbaby.com. You should check them out now; you understand me! In October 2005- The Exploration Project is going into the studio to complete a second live Cd; The first live Cd will be out in two weeks; called The Exploration Project Live. It might even be a double Cd offering! As always- Contact can be made at Website- explorationprojand E. Mail at explorationproj@aolALL MUSIC OF THE EXPLORATION PROJECT IS SPONTANEOUS NOT REHEARSED AND NOT WRITTEN DOWN!
