SCI-FI PROGRESSIVE POP ROCK 9 MP3 Songs POP: with Electronic Production, POP: with Live-band

Production Details: What is Venus Bullet? "A space-aged orgasm on a war trip. " "Sci-fi induced progressive rock personifying the femme fatale heroine of a lunar revolt. " "VB is sparkly, misty, and ballsy without losing its shades. " "It's all about the shades ... and the bubbles. " Imagine Sting and Incubus conceiving a child, a girl. Meanwhile Dream Theater and Flaming Lips give birth to a boy. Then the two children have a child, a gorgeous bitch, and shoot her to the cosmos. Venus Bullet is the sonic vessel she would travel in. Keys and guitars have dueled long before Venus Bullet, but Angga Tarmizi may be the first on the planet to pit both instruments against each other, at the same time - left hand vs. right. Occasionally, a hand sweeps through the air, as Angga caresses his 'AirSynths', the first new instrument of the new Millennium. Determined to take his musical split personalities to the moon, Angga transformed his former band Magick into a new force. After an extended adventure in Poland as a top 10 finalist in Polish Idol, Mike Zawitkowski returned to the country of his birth looking for new conquests. Nothing could prepare him for the ride he hitchhiked with Venus Bullet. Armed with soaring vocals, Mike strapped in next to Angga like a seasoned pilot. When drummer Rob Cross and bassist Rozhan Razman (a.k.a. Phunky Diablo) joined the VB ship with their stage charisma, charm, and intuitive rhythm, a solar eclipse encompassed the basement they rehearsed in, and a star act was born.. Their debut EP, Fables of Divination, includes chapters out of the saga of Venus Bullet, a femme fatale character leading the revolt of the moon against imperial earth. The story in its entirety will be told in the hotly anticipated double-length album, titled Stunning as Venus, Fatal as a Bullet. In the meantime, Venus Bullet's live shows and latest album are more than enough to satisfy a listener's sensual lust. Don't you dare miss the ride! Guns blaze at WWW.VENUSBULLET.COM
