wallpaper script is php script to create wallpaper sites. It is simple in use and serves to list and share wallpapers. Wallpaper script allows to list wallpapers by category, tag in 4 different orders. You can order wallpapers by date, download count, downloads in last 7 days, rating. Each wallpaper has indicator bars to display total download ratio, download ratio in last 7 days and positive or negative rating. Everyone can rate any wallpaper up or down allowing site visitors to demonstrate what wallpapers they like and which ones they don't. It gives idea about what people like. Wallpaper Script automaticly resizes wallpaper on upload to thumbnails. On download request site will display available standart wallpaper sizes according to originally uploaded wallpaper and resize it to choosen download size.
